Q: Django-filter how to use ModelListExtra to pass single objects? My question is similar to this one, but I do not have a nullable BooleanField, so I cannot use a ModelListExtra. I am using Django-filter to get a list of products and only want to exclude some from the results (in this case, I want to exclude some products if a specific user does not have permissions to view them). I tried the following with no success (the list is successfully filtered): products = Product.objects.filter(user=request.user, location=user.get_profile().get_location()) products = products.extra(select=Product.location_id) products = products.extra(select=Location.id, exclude=Product.location_id == Location.id) [snip] products = products.extra(select=Product.location_id, exclude=Product.user == user) I have also tried: products = products.extra(select=Product.location_id, exclude=(Product.user == user or Product.location_id == Location.id)) but that resulted in the same error as the first example. Any thoughts on this? A: You can use field lookup: from django.db.models import

What are the best Photoshop Elements alternatives? Adobe Photoshop Elements and Adobe Photoshop have similar toolsets, but they are not exactly the same. Photoshop Elements is aimed at hobbyists, graphic designers, photographers and other people who often don't need the full power of Photoshop. While Photoshop Elements has a lower price tag and simpler user interface, there are several alternatives to Adobe Photoshop. We've taken a look at some of the Photoshop Elements alternatives to help you find the best alternatives to Photoshop as well as keep you from making a purchase you'll regret. While most of the alternatives to Photoshop Elements are free, you should still be aware of the differences before you buy. Here are some of the best alternatives to Photoshop Elements 2019. Adobe Photoshop Alternatives for Photo Editing As Photoshop Elements is not aimed at photo editing, the standard Photoshop is the best option for anyone looking to edit photos. Adobe Photoshop is an industry-standard photo-editing program. It has many different tools for photo editing, but it doesn't have an image editor for web design and web design is not necessarily its strong suit. The best Photoshop alternatives are the same in many ways and allow you to achieve the same results. Below is a list of the top alternative Photoshop and Photoshop Elements. 1. Adobe Photoshop Adobe Photoshop is the most popular photo editing and design program. It has millions of users and is a market leader in the photo editing field. Photoshop is also the go-to option for web designers. The main reason that Adobe Photoshop is a popular option is because of its growing features and capabilities over time. Like any other software with this many users, Adobe Photoshop is prone to constant updates. Many of the Photoshop alternatives are similar to Photoshop in their capabilities, and you can find most of the same tools and features in alternatives like Photoshop Touch, Paint Studio, Pixelmator, and Paint.NET. Adobe Photoshop, however, has multiple other benefits that the other Photoshop alternatives lack. Up to date Adobe Photoshop is updated more regularly than the other alternatives. This means that Adobe Photoshop is running faster and gives you a more modern and stable experience than the other photo editing alternatives. Adobe Photoshop can also perform better than most alternatives in complex edits. Empowered Adobe Photoshop is designed to be a suite of imaging programs, so it includes tools that are a681f4349e

The second-annual UFC on FOX Sports 1 1 event is expected to feature many of the top female prospects in the world today, including the man who has split hits with UFC middleweight champion Chris Weidman since 2012 – Beth Correia. Correia was scheduled to fight Leslie Smith, but the Brit has been pulled from the lineup and will serve as the second half of UFC on FOX Sports 1 1, likely against either Penne or Simpson. Instead, on Nov. 15, Correia will face longtime kickboxer Andrea Lee (11-2) of Spokane, Wash., who has recorded eight stoppages in nine professional wins. Lee is the only fighter in the UFC women's middleweight division who has never been submitted in his professional career. He fought for the Strikeforce and Dream promotions in the past, but now resides in the UFC as the promotion's longest-reigning champion in the women's middleweight division at 18-months. Lee, who is the No. 13-ranked fighter in the USA TODAY Sports/MMAjunkie.com MMA women's middleweight rankings, comes into the fight with the best UFC women's middleweight win streak of her career at three. The 33-year-old has also fought and won in the first two UFC events of 2013, beating Bec Rawlings by TKO by a first-round knockout. For Correia (10-3-1), the season 13 "Ultimate Fighter" alumnus from Curitiba, Brazil, fought her way through the tournament and made it to the finals before she was defeated by Ronda Rousey. She won the first "TUF" fight of Rousey's career with a second-round knockout, but the fight was never made official due to Rousey's coronation as the sport's first women's bantamweight champion. In UFC on FOX Sports 1 1's main event, former lightweight champion Frankie Edgar (18-3-1) of Stockton, Calif., makes his middleweight debut, taking on former UFC light heavyweight title challenger Gray Maynard (24-5), who lost to current light heavyweight champion Jon Jones at UFC 152 in September. // // Generated by class-dump 3.5 (64 bit) (Debug version compiled Oct 15 2018 10:31:50)

Q: Ionic 2 how to achieve transition in a for loop? I'm learning Ionic 2/Angular 2. I have a for loop that returns different cards/divs based on the number that user gives. If a user gives 1, there will only be one card on the page. If the user gives 2, there will be two cards on the page. And so on. I'm trying to make the pages transition (slide/slide out) when the user leaves or returns to the page. This is my code: Events {{data.day}} {{data.time}} {{data.name}} {{data.location}}
