### What's new:

**Posted Jun 15, 2017 9:00:19 PM EDT** Helical representations of periodic perception: phenomenological evidence from trichromatic colour vision. An exact colour perception of the external world involves three effects: (1) the two-dimensional projection of three-dimensional retinal coordinates on to three-dimensional colour space; (2) the internal (colour) representation of relative lightness and saturation; (3) the ordering of colours according to the perceived spatial order. The human internal representation has so far been described in a phenomenological manner. Comparative anatomical investigations of the neural mechanisms controlling colour perception could reveal whether the functional three-dimensional projective effect is the same three-dimensional structural effect that underlies colour visual perception. The following reflects this perspective.

First, an analysis of colour samples that have been reported as being perceptually and physically equal under visual conditions is carried out; then some anatomical evidence of the internal representation of colour is reviewed, and trichromatic colour vision is shown to be the best candidate for a common two-dimensional projector in the living. In an interview with Solutions Journalism, Howard said he is trying to "create some room" for new initiatives at his school, which is "in a bit of a renaissance moment," he said. "I'm going to create that room in big ways, whether it's through targeted hires or strategic collaborations or lab-based pedagogies or research projects. But I'm looking for the best people in the field to help us." Reinhardt-Lichter wrote a blog post on why teacher and teacher-leaders are valuable and in need of reform: The average big-city teacher earns \$51,140 per year. During the 2011-2012 school year, according to data collected by the National Education Association, 34,055 nontenured teachers quit their teaching jobs, or about 11 percent of the nation's teaching workforce. About 400 teachers are awarded Teach for America jobs annually. And in the wake of Hurricane Sandy, D.C. Because it looks really stupid ;)" @Boss - try to get to know the game first before asking if it's good or bad. Gambling is not proper to ask about games. Going back to the question, the game is average at best for me. Had I not read through forums and other comments it probably would have gone unnoticed. After reading through all this I figured this is what I was getting for my time. The game is fairly original, so I won't be bashing it too hard. The boss characters are average.
