It's time to make a statement. Take your best shot. It's time to ROCK. While the 1950s were a time of "short-skirt" parties, there were also a lot of blue-collar people with blue-collar problems getting in trouble. Jump Gunners is a side-scrolling action game where players take on the role of an American Gunfighter... or Gunner! When blue-collar town of Springfield's peace-loving citizens weren't out on the town getting into trouble, they found themselves knocking over liquor stores, robbing banks and dealing with an onslaught of gangsters. They needed help. Enter Greenway's "Jumpers". Jumpers were tough, strong men who could stop bullet sponges and wield fire axes with their teeth. They were also the only cops in town, and they needed the town's "screw-ups" to be put on some ice.

---

Jump Gunners takes a few liberties with the era to make sure that you got some action when you play, and it does so in a fun, tongue-in-cheek way. The 1950s western culture is brought to life with a sense of humor as you'll play as anthropomorphic robots, gamblers, cowboys, gangsters, and everything in between. Oh yes, the list of personalities is HUGE. This 3D platformer is jam-packed with 2-player split-screen action, large amounts of unlockable characters and weapon combinations to use, and the biggest list of random level challenges I've seen in a platformer to date. Blue-collar problems? Time to make a statement. Take your best shot. It's time to ROCK. **already outdated! After having finished this game I really disliked it and just wanted to comment how outdated the game is. First I want to stress that this game is still a great game and it's true. I really liked this game a lot. Unfortunately the game stopped being updated a long time ago and only has support for iPad. But no matter how much I love this game, it's more and more outdated. On one hand the game allows you to swipe and use a trackball to go through the world but on the other hand you do not need to touch the screen. I really want to install the game on my iPad and play it there but the game will not start on the iPad. I really like the sounds in this game, even now the sounds are really good. So I am a bit disappointed that this game isn't working on my iPad. I really believe that this game could be updated into something awesome, to get it back to its former glory. This could be a huge chance for this game and people that never had the chance to try this game can really get into this world. Undecided Really? This game was a lot of fun. Some days later I bought a second copy of it. And I thought I was going to like it more than the first time. But I ended up on it again it was fun again. So it looks like I'm not the only one. The only thing that I didn't like was that you couldn't change which letter you pressed to solve the puzzles. I also didn't like that when you had to solve a puzzle you couldn't bring up the hint. So after half an hour of thinking about it I decided to just read the "hint" options. This game really had me drawn in. You will feel like you are on a space ship in a random part of the world. And all you can do is hit buttons on a touch screen. It's a really fun and exciting game. It's probably the game that I've played the most in the last months. But the main reason why I'm giving it 4 stars is the price. I bought this game for 40 bucks. And I would give it 5 stars if it was**

### **System Requirements For The First Day:**

**This mod adds nine unique cloth options in the Game Options Menu, tailored to be used with different bows/crossbows. Each option includes standard AI (if enabled) as well as custom AI. Each one is tailored to have custom/unique physics to accompany it. For example, the Magma Cloth has no secondary arms on it and is extremely heavy, so it will try to drag the player along while being out in the open, giving the player no chance to sneak up on them. In contrast, the Firestarter Cloth is more passive and will let the player**
